CERAMSTEEL[®]

Create your terrace with ceramic tiles

8
Adhesive EPDM grout
> Load balancing
> Damping, provides more comfort

8
Blocking crosspiece
> Scored for 2, 3 or 4 starts
> Robust, screw into the framework

The 9 good reasons for choosing CERAMSTEEL[®]

1 The **All terrain** solution
> On existing slab or tiling
> On rough, uneven ground

2 **Quality materials**
> Galvanized steel, 10-year anti-corrosion warranty
> Manufactured production

3 **Anti-torsion system**
> No structure deformation
> No rising humidity
Permanent ventilation
> Durability of the works

4 **Unique resistance**
> Self-sustaining system
sustaining 1,100 lbs/m²

5 **Easy operation**
> Laying guide for a constant spacing
between the rails
> 1 to 23 cm adjustable stud

6 **Fixing accessories**
> Sabot or angle iron for wall fixing
> Connector for bearing Omega
> Profile and finish vertical
Accessories.

7 **Specific tools**
> Use of a nibbler for cutting without
projection, low-noise and preserving
galvanization
> Self-drilling screws
(steel or stainless)

8 **All format ceramics**
> All format ground ceramic tiles
> 20mm minimum thickness
> Blocking crosspiece
> Damping EPDM grout

9 **Patented System**
> French manufacturing
> Controlled quality
